

Tutoring Prospects (Revised – September 2019)

Check list for parents before seeking outside tutors:

Teachers should be the first stop for extra help for students.

Has your child asked for extra help?

Have they attended the sessions offered?

If their teacher isn't able to assist, is there another at the school who might be available for extra help?

When receiving the extra help is your son/daughter doing the work required to benefit from what is readily available for free?

Would some in-home online help be enough for your self-starter who just needs a little something extra?

The Khan academy offers free assistance on a wide variety of topics. Check it out at www.khanacademy.org

For math, the IXL website offers interactive support from pre-K to grade 11 and can be tailored for the Nova Scotia curriculum. The cost is \$9.95/month or \$79 per year. www.ixl.com

If they have tried all they can and are still in need of help, the following is a list of people and/or organizations in our community who have expressed an interest in tutoring. This, however, does not constitute an endorsement by the school. This list is for your convenience only, as a support for your quest for information.

Parents/Guardians: The following names are of those individuals/organizations who have approached our school and have asked to be on this handout. This list is not an endorsement by Millwood High School. Millwood High School is not responsible for anyone on this list.

Michael Chiasson
